

Club Car®

## INTRODUCING THE CLUB CAR 411

Compact, Electric, Versatile

The Club Car 411 utility vehicle is the compact all-electric vehicle designed with your campus in mind. Ideal for low-speed logistics and cargo services, it fills the gap between full-sized trucks and small utility carts, soon to be the MVP of your campus fleet.

## COMFORTS THAT GET THE JOB DONE

The 411 LSV replaces a full-sized truck, but it doesn't leave the comforts behind. Unlike many utility vehicles, the 411 sports lockable doors, a back-up camera, radio, and the real music to your crew's ears, ventilation and heat.

Choose from a van box, pickup or flatbed design to customize your utility vehicle to your work.

## POWER TO PERFORM, ECONOMICALLY

The 411 LSV's powerful all-electric motor has the range to handle a full day's work and recharge overnight.

Equipped with a 13.4 HP motor, and up to 1,246 lbs (565 kg) payload capacity the Club Car 411 has the power to tackle any job so you can do your best work.

## CLUB CAR 411 - DESIGNED FOR YOUR WORK DAY

In addition to its cargo capacity, the 411 has numerous other features designed to get the job done efficiently and comfortably.

- Power-assist steering
- 4-wheel hydraulic disc brakes
- Standard backup camera
- Cabin heat and ventilation
- LCM display - Speedometer, battery health, FM radio
- Optional GPS locator with alerts, and geofencing

In addition, the 411 LSV meets low-speed vehicle compliant safety standards for the U.S. and Canada, comes with a Vehicle Identification Number (VIN) and once registered, can be driven on roads posted 35 mph or less.
